

A classic warmer with a twist. Students must find the differences by describing their images to each other. No peaking! There are 8 differences in total and they are marked with red circles in the pictures below.

The images are in 360° and can be viewed on smartphones. Test it out with your smartphone now by scanning the QR codes next to the images. Once the page opens hit the **"Open New VR Tab"** button. Then hit **"Allow"** to use motions sensors. Then just have a look around!

If you have a smart board or projector, head to www.english-able.com/spot-the-diffs for the QR codes to display to your students.
